Teaching Assistant

August, 2012 - December 2012

Coordinated a team of seven undergraduates to grade for Introduction to Business Statistics. Duties included creating a rubric each week and ensuring consistent grading across all sections.

The University of Texas, Austin, Texas USA

Research Assistant

April, 2011 - July, 2012

Worked under Prof. Tasha Beretvas to conduct a simulation study assessing use of Bayesian estimation procedures to estimate a two-level cross-classified random effects model (CCREM) with correlated Level 2 residuals. Designed an R function that simulates cross-classified data and then utilizes OpenBUGS to estimate different models including: multiple membership, unconstrained multiple membership, uncorrelated-residuals CCREM, correlated-residuals CCREM, and a fully multivariate CCREM.

Graduate Student

August, 2006 - December, 2010

Includes Masters level coursework and report research.

Teaching Assistant

August, 2008 - May 2009

Lead 130 students in six weekly discussions with the analysis of concepts and introduction of applications for Calculus II and Introduction to Mathematics. Assisted faculty with the conduct and delivery of classroom material. Graded exams and supervised homework grader.

Summer REU

June, 2006 - August 2006

Participant in Extensible Undergraduate Research in Communications Applications, a summer REU in the Department of Electrical Engineering sponsored by the National Science Foundation for research in the areas of Communications, Networks and Systems. Worked on optimization of binary erasure channels project with Prof. Sriram Vishwanath at the University of Texas.

Research Assistant

June, 2005 - March 2006

Worked under Prof. Tasha Beretvas to identify different methods of effect size estimation and helped to evaluate the advantages and disadvantages of each method. Designed a JAVA program that facilitated data entry and assisted in other researchers' data analysis.

Applied Research Laboratories, Austin, Texas USA

Graduate Research Assistant

August, 2006 - February 2007

Research with a concentration in active and passive data fusion. Programmed graphical work in signal processing using Matlab.
